User Story Analysis Miro Board

How to use this board?

The practice in details

Adjust to your context

Think about what they mean to know about the user story (could be done before the User Story Analysis)

Perform the Test Analysis

Keep asking "why?"

Visualise your user

Keep asking "what could go wrong?"

Prioritise the Qualities

Breakdown what needs to be done to create the user stories

Keep asking "what could go wrong?"

Define something needed to test the user conditions: user cases, test data, test steps

Use the User Stories to test the User Story, including the requirements

Identify what "is" and "is not" the user conditions

Don't repeat it down to nothing

Have on the list changes for every detailed user story you have

1. Text Analysis Checklist

The text checklist

A user story must be...

Clear	Compact	Complete
No scope creep/out	No repetitions	No performance
Well-articulated		

The User Story

Text analysis example

- "I want to see the changes on the document" is not a goal
- "In the Sub-Done" is unnecessary
- "Thinking" or "Try?" Can't be tested
- "I want to see the changes on the document" is not a goal
- "In the Sub-Done" is unnecessary
- "Thinking" or "Try?" Can't be tested
- "I want to see the changes on the document" is not a goal
- "In the Sub-Done" is unnecessary
- "Thinking" or "Try?" Can't be tested

2. Revealing the Context

Context analysis example

Context analysis example

Keep asking why!

Q: Why do they want to see these changes on a submission?

A: They want to see which approved or rejected submission.

Q: Why do they want to go to the top of the list about in the submission list?

A: They don't want to see the rejected ones, only the approved ones.

Q: Why do they want to see the approved or rejected submission?

A: Because they want to see the approved or rejected submission.

3. User Visualisation Technique

Visualise your user

Visualise your user

Where is your user now?

What time of the day is it?

Where are they coming from?

What device are they using?

What do they do at the moment?

What do they want to do next?

What do they expect from the system?

Are they in a hurry?

What happened to them yesterday?

How do they feel at the moment?

What do they want to do next?

What do they expect from the system?

Are they tired?

What do they expect from the system?

Are they in a hurry?

What happened to them yesterday?

How do they feel at the moment?

What do they want to do next?

What do they expect from the system?

4. GNI Q R Analysis

GNI Q R Analysis

GOALS

NEEDS

INTENTIONS

QUALITY

RISKS

5. Quality & Test Analysis

Quality & Test Analysis

What must always work?

What could go wrong?

What if...?

Expected Behaviours

Test Conditions - What to Test?

Test Cases - How to Test?

Test Users

Test Environment

6. Tasks

Make the plan

Communication

Dev-Ops

Testing

UX/UI Design

Marketing

Coding

Customer Support

Technical Writing
